

Registering your ESP License

ThoughtWorks
Software Solutions

Your license of ESP will need to be registered if any of the following is true:

- You are installing a new copy of ESP for the first time
- You are extending the temporary expiry date of ESP for an evaluation copy
- You are adding more departments to a computer that already has ESP
- You are reinstalling after a computer crash or replacement

The screenshot shows the 'ESP Options' dialog box with the 'Locations' tab selected. The dialog has a sidebar on the left with tabs for 'Operation', 'Departments', 'E-mail configuration', 'Licensing', and 'Date and Time'. The 'Locations' tab is active, displaying a table with columns for 'Active', 'ID', 'Name', and 'Description'. Below the table is a text input field with a 'Click here to add a new row' prompt. The table contains one row with a checked 'Active' box, 'ID' of 25000, 'Name' of 'Main Street', and 'Description' of 'Data from 25000'. At the bottom of the dialog are 'OK' and 'Cancel' buttons.

Active	ID	Name	Description
<input checked="" type="checkbox"/>	25000	Main Street	Data from 25000

Start ESP and open the data file you wish to license. From the [HOME](#) form, choose [FILE | OPTIONS](#) from the menu, and select the [DEPARTMENTS](#) tab as shown above. Enter information for each column. Note that the [ID](#) must uniquely identify your location, and is normally your location number. The [NAME](#) is typically a more descriptive name that is printed on all your reports.

Once you have defined your store and department information, select the [LICENSING](#) tab.

Fill out the remaining information fields as described below:

Machine ID: Do not change this. If you accidentally overwrite this field, click the [RESET](#) button to reset it back to the correct value.

License name: Enter your company or corporate name. If you are a franchised location it should be the name of the company that your franchisee uses.

Site name: This must be the same as the Department ID that you entered on the Departments tab. Normally this is automatically filled in and you should not change it.

Site count: Set this to 1 unless you are scheduling multi-department or satellite locations that share employees with your primary location.

Home path: This should be filled in for you automatically with the path to your ESP data file. You should not change this unless you are familiar with ESP data files and their location.

The screenshot shows the 'ESP Options' dialog box with the 'Licensing' tab selected. The 'License' section contains the following fields and values:

Field	Value	Reset Value
Machine ID:	6444 2442 5016 3733	2440
License name:	Your company name goes here	37867
Site name:	25000	12728
Site count:	1	49502
Home path:	C:\ESPDATA\25000.ESP	37033
	Browse...	39570

Below the license fields, there is a 'Copy to clipboard' button, an 'Enter license key' button, and a 'Reset' button. To the right, the 'Status' section displays:

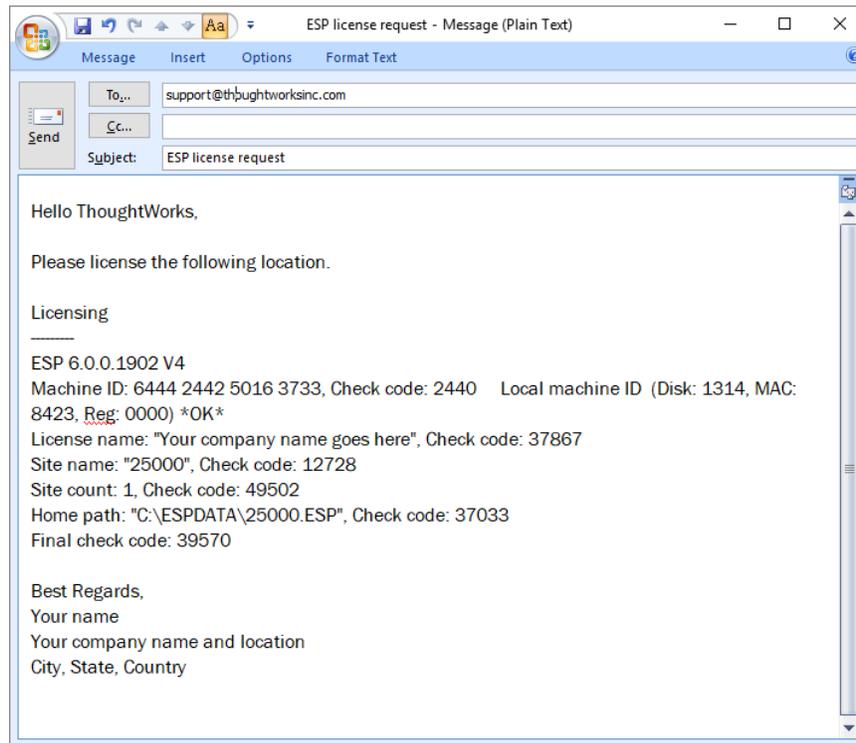

Status
ESP 6.0.0.1902 V4
Valid license
Employee limit: 200
Enter a validation code to permanently license this new configuration

At the bottom of the dialog are 'OK' and 'Cancel' buttons.

Once you have entered this information, click the [COPY TO CLIPBOARD](#) button. This will allow you to paste this information into an e-mail message and send it to ThoughtWorks.

Sending your information to ThoughtWorks

Create a new mail message using your e-mail software, with support@thoughtworksinc.com as the addressee. In the body of the message, paste your information by pressing CTRL-V, or by clicking EDIT | PASTE from the menu. Your e-mail should look something like this:

Be sure to include your own name, location and phone number, and send your e-mail to:

support@thoughtworksinc.com

We will respond with a license key. When you receive the license key, enter it on the licensing screen by clicking the ENTER LICENSE KEY button.

If you have any questions, or need any help with these procedures please don't hesitate to contact us.
